

SCAMPISM Team Training

SCAMPISM team training prepares participants to perform as a team members using the SCAMPISM method. The training objective is to prepare students to effectively participate as team members. This includes understanding appraisal planning, reviewing documents, interviewing people, recording and consolidating data, and documenting and reporting appraisal results.

This course uses lectures, exercises, and a guided case study that simulates an actual appraisal. It is highly interactive and is delivered in a team-based environment. This format helps participants develop appropriate skills and confidence in applying their skills. Students use our automated tool, Appraisal Wizard[®], to further facilitate the learning experience. Participants receive read-ahead material and there are homework assignments.

This course is delivered using Software Engineering Institute (SEI) licensed course materials, additional ISD augmented materials, and is presented by a SEI Certified Lead Appraiser.

Course Content

The course is composed of lectures, class exercises, and a case study with significant opportunity for participant questions and discussions.

- Understanding the Appraisal Framework;
- Learning about the SCAMPISM method
